

Greetings, Please keep access to Instant Traffic & Weather on XM Radio. I'd like to be able to tune into an area I'm traveling to see how the traffic is flowing. If things were bad, I could take another route and not add to the problem. Where else would I get this information on the road? The same may apply to the weather in other areas.

Please reject NAB's petition 04-160.

I'm paying for a service to be able to listen to stations while traveling that don't fade out like any NAB station would.

Thank you for your attention,

John Law
